LIST OF ILLUSTRATIONS

1	S. C. S. M. (= Matthias Sambucellus), a member of Glareanus's Burse, wrote handwritten commentaries in his own copy of Glareanus's <i>De situ Helvetiae</i> (Basel 1514). He started with the remark: "Explanatio vocum minus bene cognitarum que in geographia helvecie continentur, quod carmen ipse Henricus Glareanus Basileae in studiorum contubernio 19 Calendas Janua[rij] palam omnibus gymnasij cultoribus decantavit paulo ante annum Christi servatoris nostri 1515 et subinde diligenti labore exposuit." It is the only known testimony of a private lecture held by Glareanus in his Basel Burse (Universitätsbibliothek Basel, call number: AN XIV 60)	4

The notes by Glareanus on the flyleaf refer to the <i>Dodekachordon</i> . Glareanus wrote that he corrected this imprint with a lot of errata by his own hand, but we know, that he only corrected a master-copy and wrote this introductory passage in several copies of his <i>Dodekachordon</i> by his own hand. Georg Spierer then transferred his corrections, at least to this Paris volume, containing the <i>Dodekachordon</i> and the <i>Chronologia</i>	16
