

CFAC – The Aviation Series

Edited by Prof. Dr. Roland Müller and Dr. Andreas Wittmer

Volume 10

Andreas Wittmer / Sebastian Daum

Multidimensional Decision Behavior in Air Transport

Table of Contents

1	Introduction	11
1.1	Aim and need to analyze transport decision behavior	11
1.2	The research object: Public transport with a focus on rail and aviation	13
1.2.1	Politics	17
1.2.2	Supply	20
1.2.3	Demand	22
1.3	Methodological approaches	24
1.4	Structure	27
2	Beyond rational consumer decisions (choices)	28
2.1	Fundamentals and theoretical background why irrational is not unreasonable	28
2.2	Judgment and decision making	34
2.3	Prospect theory as a basis for decision-making under risk	36
2.4	Theory of planned behavior	37
2.5	Information processing theory (bounded rationality)	37
2.6	Customer value theory	38
3	Decision making behavior in Transport: A Synthesis	43
4	The concept of well-being	52
4.1	Introduction into the concept of well-being	52
4.2	Well-being perspectives	53
4.2.1	Objective versus subjective well-being	53
4.2.2	Hedonic versus eudaimonic well-being	54
4.2.3	Consolidation	56
4.3	Well-being – a multidimensional construct and its effect on human motivation	57
5	Well-being in travel and transportation research	60
5.1	Well-being as perceived utility in travel choice making	60
5.2	Well-being as concept to measure travel satisfaction	61
5.3	Travelling and the effect on well-being	62
5.4	Results	62
6	Well-being factors for the airline ticket purchasing process	65

7	References	69
8	Appendix 1: Academic foundation	86
8.1	Authors contribution – explaining main customer and service factors in air transport	86
8.2	Purchasing a general ticket for public transport	88
8.3	Customer value drivers of railway customers: What drives value for railway passengers?	90
8.4	Customer value as a framework for analyzing customer services in the airline industry	92
8.5	The valuation of direct intercontinental flights as opposed to non-direct ones: Insights based on a hedonic approach	94
8.6	Importance of direct flight connections between Switzerland and the Far East: A Logistic Choice Model	96
8.7	A case study on Swiss travelers and their air travel preferences on transatlantic flights	98
8.8	The perception of time in air transport – what delay is accepted by air travelers?	99
8.9	Customer value factors of Very Light Jet air taxi passengers	102
8.10	Customer value of purchasable supplementary services: The case of a European full network carrier's economy class	103
8.11	The future of ancillary service fees in air travel – an exploratory investigation of budget air travelers	105
8.12	Attitudes of frequent flyers towards limited air connectivity	107
8.13	Financial, ecological and managerial impacts of Emission Trading Schemes: The case of Lufthansa	108
8.14	Passengers' attitudes towards environmental activities by airlines	113
8.15	Swiss regional airport network – identifying brokerage roles and simulating structural changes	115
8.16	Intangible regional effects of regional airports: A system analysis of Switzerland	118
8.17	New technologies – acceptance of self-service check-in	121
9	Appendix 2: Practical Implications	124
