

Introduction to  
Mediation, Moderation, and  
Conditional Process Analysis

---

A Regression-Based Approach

---

SECOND EDITION

Andrew F. Hayes

*Series Editor's Note by Todd D. Little*

THE GUILFORD PRESS  
New York      London

# Contents

## PART I. FUNDAMENTALS

<b>1 • Introduction</b>	<b>3</b>
1.1 A Scientist in Training	3
1.2 Questions of Whether, If, How, and When	5
1.3 Conditional Process Analysis	9
1.4 Correlation, Causality, and Statistical Modeling	15
1.5 Statistical and Conceptual Diagrams, and Antecedent and Consequent Variables	19
1.6 Statistical Software	22
1.7 Overview of This Book	24
1.8 Chapter Summary	27
<b>2 • Fundamentals of Linear Regression Analysis</b>	<b>29</b>
2.1 Correlation and Prediction	30
2.2 The Simple Linear Regression Model	34
2.3 Alternative Explanations for Association	45
2.4 Multiple Linear Regression	48
2.5 Measures of Model Fit	54
2.6 Statistical Inference	56
2.7 Multicategorical Antecedent Variables	65
2.8 Assumptions for Interpretation and Statistical Inference	68
2.9 Chapter Summary	73

## PART II. MEDIATION ANALYSIS

<b>3 • The Simple Mediation Model</b>	<b>77</b>
3.1 The Simple Mediation Model	78
3.2 Estimation of the Direct, Indirect, and Total Effects of X	82
3.3 Example with Dichotomous X: The Influence of Presumed Media Influence	86
3.4 Statistical Inference	93

3.5	An Example with Continuous X: Economic Stress among Small-Business Owners	107	
3.6	Chapter Summary	112	
<b>4</b>	<b><u>Causal Steps, Confounding, and Causal Order</u></b>		<b>113</b>
4.1	What about Baron and Kenny?	113	
4.2	Confounding and Causal Order	121	
4.3	Effect Size	132	
4.4	Statistical Power	140	
4.5	Multiple Xs or Ys: Analyze Separately or Simultaneously?	141	
4.6	Chapter Summary	146	
<b>5</b>	<b><u>More Than One Mediator</u></b>		<b>147</b>
5.1	The Parallel Multiple Mediator Model	149	
5.2	Example Using the Presumed Media Influence Study	154	
5.3	Statistical Inference	161	
5.4	The Serial Multiple Mediator Model	167	
5.5	Models with Parallel and Serial Mediation Properties	180	
5.6	Complementarity and Competition among Mediators	183	
5.7	Chapter Summary	186	
<b>6</b>	<b><u>Mediation Analysis with a Multicategorical Antecedent</u></b>		<b>187</b>
6.1	Relative Total, Direct, and Indirect Effects	189	
6.2	An Example: Sex Discrimination in the Workplace	195	
6.3	Using a Different Group Coding System	204	
6.4	Some Miscellaneous Issues	212	
6.5	Chapter Summary	215	
 <b>PART III. MODERATION ANALYSIS</b>			
<b>7</b>	<b><u>Fundamentals of Moderation Analysis</u></b>		<b>219</b>
7.1	Conditional and Unconditional Effects	223	
7.2	An Example: Climate Change Disasters and Humanitarianism	231	
7.3	Visualizing Moderation	243	
7.4	Probing an Interaction	248	
7.5	The Difference between Testing for Moderation and Probing It	259	
7.6	Artificial Categorization and Subgroups Analysis	263	
7.7	Chapter Summary	265	
<b>8</b>	<b><u>Extending the Fundamental Principles of Moderation Analysis</u></b>		<b>267</b>
8.1	Moderation with a Dichotomous Moderator	268	
8.2	Interaction between Two Quantitative Variables	276	
8.3	Hierarchical versus Simultaneous Entry	289	
8.4	The Equivalence between Moderated Regression Analysis and a 2 × 2 Factorial Analysis of Variance	292	
8.5	Chapter Summary	301	

<b>9 • <u>Some Myths and Additional Extensions of Moderation Analysis</u></b>	<b>303</b>
9.1 Truths and Myths about Mean-Centering	304
9.2 The Estimation and Interpretation of Standardized Regression Coefficients in a Moderation Analysis	313
9.3 A Caution on Manual Centering and Standardization	319
9.4 More Than One Moderator	320
9.5 Comparing Conditional Effects	342
9.6 Chapter Summary	346
<b>10 • <u>Multicategorical Focal Antecedents and Moderators</u></b>	<b>349</b>
10.1 Moderation of the Effect of a Multicategorical Antecedent Variable	350
10.2 An Example from the Sex Discrimination in the Workplace Study	354
10.3 Visualizing the Model	362
10.4 Probing the Interaction	366
10.5 When the Moderator Is Multicategorical	379
10.6 Using a Different Coding System	387
10.7 Chapter Summary	388
<b>PART IV. CONDITIONAL PROCESS ANALYSIS</b>	
<b>11 • <u>Fundamentals of Conditional Process Analysis</u></b>	<b>393</b>
11.1 Examples of Conditional Process Models in the Literature	397
11.2 Conditional Direct and Indirect Effects	402
11.3 Example: Hiding Your Feelings from Your Work Team	407
11.4 Estimation of a Conditional Process Model Using PROCESS	414
11.5 Quantifying and Visualizing (Conditional) Indirect and Direct Effects	417
11.6 Statistical Inference	423
11.7 Chapter Summary	430
<b>12 • <u>Further Examples of Conditional Process Analysis</u></b>	<b>431</b>
12.1 Revisiting the Disaster Framing Study	432
12.2 Moderation of the Direct and Indirect Effects in a Conditional Process Model	439
12.3 Statistical Inference	453
12.4 Mediated Moderation	459
12.5 Chapter Summary	467
<b>13 • <u>Conditional Process Analysis with a Multicategorical Antecedent</u></b>	<b>469</b>
13.1 Revisiting Sexual Discrimination in the Workplace	470
13.2 Looking at the Components of the Indirect Effect of X	480
13.3 Relative Conditional Indirect Effects	487
13.4 Testing and Probing Moderation of Mediation	491
13.5 Relative Conditional Direct Effects	495
13.6 Putting It All Together	500
13.7 Further Extensions and Complexities	501
13.8 Chapter Summary	502

## PART V. MISCELLANEA

<b>14 • Miscellaneous Topics and Some Frequently Asked Questions</b>	<b>507</b>
14.1 A Strategy for Approaching a Conditional Process Analysis	509
14.2 How Do I Write about This?	514
14.3 Should I Use Structural Equation Modeling Instead of Regression Analysis?	527
14.4 The Pitfalls of Subgroups Analysis	530
14.5 Can a Variable Simultaneously Mediate and Moderate Another Variable's Effect?	536
14.6 Interaction between <i>X</i> and <i>M</i> in Mediation Analysis	540
14.7 Repeated Measures Designs	541
14.8 Dichotomous, Ordinal, Count, and Survival Outcomes	545
14.9 Chapter Summary	546

## APPENDICES

<b>A • Using PROCESS</b>	<b>551</b>
<b>B • Constructing and Customizing Models in PROCESS</b>	<b>613</b>
<b>C • Monte Carlo Confidence Intervals in SPSS and SAS</b>	<b>633</b>
<b>References</b>	<b>637</b>
<b>Author Index</b>	<b>668</b>
<b>Subject Index</b>	<b>679</b>
<b>About the Author</b>	<b>692</b>

Data files for the examples used in the book and files containing the SPSS and SAS versions of PROCESS are available on the companion web page at [www.afhayes.com](http://www.afhayes.com).
