

# Handbook of Systems Analysis

Overview of Uses, Procedures,  
Applications, and Practice

Edited by

Hugh J. Miser

Edward S. Quade

JOHN WILEY & SONS

Chichester • New York • Brisbane • Toronto • Singapore

# Contents

Preface	xi
Acknowledgments	xv
<b>Chapter 1. The Context, Nature, and Use of Systems Analysis</b>	<b>1</b>
Edward S. Quade and Hugh J. Miser	
1.1. Introduction	1
1.2. The Context	2
Improving Blood Availability and Utilization	2
Improving Fire Protection	4
Protecting an Estuary from Flooding	6
Achieving Adequate Amounts of Energy for the Long-Range Future	7
Providing Housing for Low-Income Families	8
Controlling a Forest Pest in Canada	11
1.3. The Nature of the Problems	12
1.4. The Characteristics of Systems Analysis	15
1.5. Science and Systems Analysis	18
1.6. Related Forms of Analysis	21
1.7. Applications	22
1.8. The Value of Systems Analysis	24
1.9. The Craft of Analysis	29
1.10. Conclusion	30
References	31

<b>Chapter 2. Systems Analysis:</b>	
<b>A Genetic Approach</b>	<b>33</b>
Giandomenico Majone	
2.1. Change and Continuity	33
2.2. From Operations Research to Systems Analysis	35
2.3. From Systems Analysis to Policy Analysis	44
2.4. . . . and Back to Operations Research	49
2.5. The Social Side of Systems Analysis: Professional and Institutional Developments	52
2.6. The Evolution of Criteria of Quality and Effectiveness	57
2.7. Conclusion: The Language of Systems Analysis	62
References	64
<b>Chapter 3. Examples of Systems Analysis</b>	<b>67</b>
Edward S. Quade	
3.1. Introduction	67
3.2. Improving Blood Availability and Utilization	68
Background	68
Approach	70
Analysis	71
Implementation	75
Computer Modules	78
Impact	78
3.3. Improving Fire Protection	79
Background	79
Origin of the Project	80
Analysis	81
Recommendations of the Project Team	85
History of the Implementation	86
Evaluation	88
3.4. Protecting an Estuary from Flooding	89
Background	89
The Analytic Approach	92
Methods for Synthesizing and Presenting Results	96
Study Results	99
Conclusions	104
The Decision	108
3.5. Providing Energy for the Future	109
Demand	112
Supply	112
System Properties	113
References	115

<b>Chapter 4. The Methodology of Systems Analysis: An Introduction and Overview</b>	<b>117</b>
Władysław Findeisen and Edward S. Quade	
4.1. Introduction	117
4.2. A Framework for Systems Analysis	121
Objectives, Alternatives, and Ranking	121
A Framework for Analysis	122
Iteration and Feedback	123
Communication	125
Phases of Analysis	126
Partial Analysis	126
4.3. Problem Formulation	127
Purposes	127
Objectives	128
Values and Criteria	130
Constraints	131
4.4. Generating and Selecting Alternatives	132
4.5. Forecasting Future States of the World	133
The Future and Uncertainty	133
Forecasting in Systems Analysis	133
Forecasting Approaches	134
4.6. Identifying the Consequences	135
Predictive Models	136
Limitations on Predictive Modeling; Experiments	137
Using Models	138
Summary Remarks	139
4.7. Comparing and Ranking Alternatives	140
Difficulties of Ranking	140
Judgmental Comparison and Ranking	141
Cost-Effectiveness and Cost-Benefit Criteria	141
Value and Utility Approaches	142
General Remarks	144
4.8. Documentation	145
4.9. Summary	145
References	147
<b>Chapter 5. Formulating Problems for Systems Analysis</b>	<b>151</b>
Peter B. Checkland	
5.1. Introduction	151
5.2. Formulating the Problem: The Concepts	153
Problems and Problem Solving	153
Exploring the Problem Area	156
5.3. The Problem Environment	159

5.4. Formulating the Problem: The Activities	161
5.5. Conclusion	165
Appendix A. A Workbook Outline to Aid Documenting the Problem-Content and Problem-Solving Systems	167
Appendix B. A Format for Issue Papers	168
References	169
<b>Chapter 6. Objectives, Constraints, and Alternatives</b>	<b>171</b>
Edward S. Quade	
6.1. Objectives	171
Measuring Effectiveness	176
Multiple Objectives	178
6.2. Constraints	180
6.3. Alternatives	182
References	188
<b>Chapter 7. Predicting the Consequences: Models and Modeling</b>	<b>191</b>
Edward S. Quade	
7.1. Introduction	191
7.2. The Need for Models	192
7.3. Modeling Techniques	194
Analytic Models	195
Simulation	196
Gaming	197
Judgmental Models	199
7.4. Model Building	203
Developing a Simple Model	203
General Remarks	205
Improving a Model	206
7.5. Predicting the Consequences	208
Establishing the Context	208
Establishing the Consequences	210
Sensitivity Analysis	211
7.6. Social Experimentation	212
7.7. What Do Models Give Us?	213
References	216
<b>Chapter 8. Guidance for Decision</b>	<b>219</b>
Brita Schwarz, Kenneth C. Bowen, István Kiss, and Edward S. Quade	
8.1. Introduction	219
8.2. Criteria	220
8.3. Satisficing	222

8.4. Suboptimization	223
8.5. Cost-Benefit Analysis and the Cost-Benefit Criterion	224
8.6. Cost-Effectiveness Analysis	227
8.7. Decision Analysis	229
8.8. Dealing with the Criterion Problem	230
8.9. Value Analysis and Political Feasibility	234
8.10. Uncertainties	239
8.11. Risk Evaluation	241
8.12. Decision Processes, Planning, and Policies	241
8.13. Guidance from the Analyst	243
References	245
<b>Chapter 9. Implementation</b>	<b>249</b>
<b>Rolfe Tomlinson, Edward S. Quade, and Hugh J. Miser</b>	
9.1. Background	250
9.2. Implementation Concerns Early in a Systems Study	253
9.3. The Role of the Systems Analyst in Implementation	255
An Example: Improved Methods of Calculation	257
An Example: An Organizational Computer System	259
Implementation Involving Multiple Organizations	265
Concluding Remarks	267
9.4. Some Additional Issues and Difficulties	268
9.5. Coping with Implementation Prior to Decision	271
Matters of Good Practice	271
Implementation Scenarios	273
Implementation Analysis	274
Social Experiments	274
9.6. Coping with Implementation After Decision	275
Mediation and Persuasion	276
Using the Power of the Mandate	276
9.7. Concluding Remarks	277
References	277
<b>Chapter 10. The Practice of Systems Analysis</b>	<b>281</b>
<b>Hugh J. Miser</b>	
10.1. Introduction	281
10.2. The Organizational Context	282
10.3. Developing a Professional Philosophy for Systems Analysis	286
10.4. Awareness of the Problem Situation	290
10.5. Formulating the Problem	293
10.6. Gathering Information	297
10.7. Formulating Alternatives	298

10.8. Choosing Modes of Analysis	299
10.9. Carrying out the Analysis	301
10.10. Formulating the Findings	302
10.11. Preparing the Communication Instruments	303
The Systems Analysis Report	304
Oral Presentation	307
Concluding Remarks	310
10.12. Additional Analysis	311
10.13. The Communication Campaign	311
An Example: Space Surveillance	312
An Example: Providing Energy for the Future	314
Concluding Remarks	314
10.14. Systems Analysis as an Agent of Change	315
10.15. Guidelines for Professional Behavior	316
Internal Evaluation	316
External Evaluation	317
Relations with Society	317
10.16. Conclusion	325
References	325
A Selected Bibliography	327
Author Index	333
Subject Index	337
